

## BESTSDI - Split summer school

### Summer school description:

Teachers and lecturers from 22 faculties, cca 50 of them, which are partners at the BESTSDI project (Western Balkans Academic Education Evolution and Professional's Sustainable Training for Spatial Data Infrastructures) will participate at the second summer school organized in Split including engagement of lecturers from Catholic University Leuven (Belgium), University of Applied Sciences Bochum (Germany) and Faculty of Geodesy University of Zagreb (Croatia).

The goal of the summer school is education of the teachers and lecturers in the field of spatial data infrastructure (SDI) and modern concepts of spatial management based on spatial data, and preparation for lecturing courses which are developed in frame of the project. Education will include adoption of new knowledges from the mentioned fields, acquaintance with the content and methodology of the SDI courses developed in frame of the project and gaining and exercising of teaching skills.

Working language: English
