# PETROLEUM ENGINEERING SUMMER SCHOOL

**INTER-UNIVERSITY CENTRE  
DUBROVNIK, CROATIA**

**Interactive Seminars - Workshops 45 and 46  
4 – 15 June 2018**

## Oil & Gas Industry Challenges and Issues

**WORKSHOP 45  
RESERVOIR EVALUATION & MANAGEMENT  
(EOR & EGR)**

4-8 June 2018

**WORKSHOP 46  
ENERGY BUSINESS - NATURAL GAS VALUE CHAIN**

11-15 June 2018

## ABOUT PESS

The Petroleum Engineering Summer School (PESS) has been operating within the academic program of advanced studies of the Inter-University Centre Dubrovnik (IUC) for 31 years (first PESS was organized in 1987).

PESS workshops, which are held in June every year, are organized by the Faculty of Mining, Geology & Petroleum Engineering of the University of Zagreb. Topics covered by the PESS are contemporary technical, technological, environmental and economic issues in field of oil and gas industry and energy industry in general.

## The Inter-University Centre Dubrovnik

(IUC), founded in 1972, is an independent, autonomous academic institution with a mission to promote international co-operation between academic institutions throughout the world. The IUC is structured as a consortium of universities and other scientific institutions that form the centre's policies and objectives. The IUC Dubrovnik maintains high standards of scientific quality, and provides an open space for critical thinking and innovation.

## CITY OF DUBROVNIK

Dubrovnik is a medieval city on the Croatian side of the Adriatic coastline and a treasure – trove of cultural – historical monuments that were created throughout its thousand-year existence. The walls of Dubrovnik girdle a perfectly preserved complex of public and private, sacral and secular buildings representing all periods of the City's history, beginning with its founding in the 7th century.

## PESS 2018

### Oil & Gas industry Challenges and Issues

WORKSHOP 45  
4-8 June 2018

### RESERVOIR EVALUATION & MANAGEMENT (EOR & EGR)

The task of the Short Course is to explore how to revitalize mature fields with the contemporary EOR/EGR methods. The scope of the course is to give the comprehensive knowledge of new technologies and reservoir characterization in exploitation of remaining hydrocarbon reserves. Application of hydraulic fracturing in conventional and unconventional reservoirs will among the Course topics.

WORKSHOP 46  
11-15 June 2018

### ENERGY BUSINESS - NATURAL GAS VALUE CHAIN

The Course will focus on challenges of energy market especially natural gas market and energy companies in changing global conditions.
