UNIVERSITY INTEGRATED UNDERGRADUATE AND GRADUATE STUDY PROGRAMMES

WHAT IS THE DURATION OF THE STUDY?	The duration of the study is 6 years (12 semesters).
WHEN DO THE CLASSES BEGIN?	Enrolment details and exact dates will be published on our official website.
HOW CAN I APPLY?	The candidate must apply with a copy of certificates of all years of high school education (if there were only three years of high school, then one should send the grade transcripts of the last four years of school (9th-12th class). With a transcript of grades as well as a final certificate with an original transcript of grades (not older than five years, except enrollment in study programs in the field of natural, biomedical, or biotechnological sciences after completing secondary education and with a diploma not older than five years. In that case, it is necessary to send a diploma of completed studies with a transcript of grades and transcripts of high school grades). Special attention will be paid to grades in the subjects of the natural science group (Chemistry, Physics, and Biology), which the candidate must have in at least two years of high school education. Suppose the candidate did not attend any of the subjects mentioned above in high school, but enrolled in a course in biomedical, biotechnological, or natural sciences study program and attended and passed that subject. In that case, the same is recognized as a prerequisite. Preparatory schools of at least 45 ECTS credits in which the candidate passed one of the subjects (Chemistry, Biology, or Physics) that he/she did not have in high school are also recognized as having met the elimination condition. The subject taken outside the secondary school will not be scored in the system of the Central Registration Office. <i>Those who are still in the last year of their secondary school studies at the time of the application deadline may also apply but must present their certificates before enrolling at the University. All prerequisites for applying to the Veterinary Medicine study program can be found on www.postani-student.hr and will be updated if necessary.</i> How to apply will be announced on the faculty web page www.vef.hr/en within the call for application for admission to the first year of Integrated undergraduate and graduate university study of Veterinary Medicine in English. The application form can be found on the faculty web page. All selected candidates must register through the Central Registration Office within the Agency for Science and Higher Education (ASHE).
WHAT IS THE TUITION FEE?	The annual tuition fee is EUR 10,500.00. It can be paid in 2 installments and then it is EUR 11,000.00 (5,500.00 x 2). The first installment has to be paid before enrolment in the 1st semester, and the second one before enrolment in the 2nd semester. The fee covers enrolment and examination fees, lectures, seminars/tutorials, practicals, and individual supervision during one academic year of the study. It does not cover living costs, accommodation, meals, or public transportation. The official Letter of Acceptance is sent upon payment of the tuition fee in electronic format.
WHAT IS THE ENROLMENT FEE?	The application fee is EUR 200.00.

FACULTY OF TRANSPORT AND TRAFFIC SCIENCES

LOGISTICS AND MOBILITY MANAGEMENT (TALENT)

New graduate university study programme focused on logistics and mobility management has been driven by the need for university-educated professionals who can creatively respond to global transport development demands using the latest commercial or open-source technologies.

This is especially so since the production and the distribution of new technologically advanced products involve global material supply chains and fast global exchange of experts and data. Modelling the new complex structures of transport systems and processes requires different measurements and ways of describing them.

The TALENT study programme focuses on training new experts to work independently and in teams adopting an interdisciplinary approach to transportation problems and applying the latest scientific and technological insights in solving them. Furthermore, the international character of the study programme implies the task of training new professionals to work in a multinational and multicultural environment using different technologies for simultaneous joint work on interdisciplinary professional and scientific projects.
